

INTRODUCTION

Father Matthew approached SDG and SCI in early May with the challenge of beautifying and re-imagining Christ the King. It started with developing conceptual ideas for what is possible in the church. We looked at current issues and concerns regarding seating, accessibility, sound systems, security, expansion of parish office and the Early Education Center. We were also challenged by Father Matthew's vision for a permanently beautiful sanctuary.

With the gathered information, we were able to create conceptual designs and rendered visions of what the space could become. Colors, forms and layouts are all flexible parts of the design and are merely a beginning phase at this point; let these concepts resonate as future options and not as permanent solutions.

We hope that these visions will strike a chord and spark a conversation about the ambitious plan for the future of Christ the King and all the possibilities it can hold. Let these designs and ideas be the foundation that we can build from and add to as we go through this journey together. Some of the colors may change and layouts may change, but the mission will stay intact: the objective will be to create a beautiful space where all can come together and worship as one. Let this be the fuel to our fire as we begin this first phase of our journey as there will be many to come.
